

Masquelier's® Tru-OPCs™

Supports whole-body health and longevity in three key ways:

Strengthens and Protects Cardiovascular System

Strengthens and protects blood vessels; reduces mild capillary fragility associated with aging; protects LDL cholesterol from oxidation by scavenging free radicals; supports the maintenance of good cardiovascular health*

Strengthens and Supports Collagen Health

Helps maintain normal levels of glycosaminoglycans and structural proteins supporting skin and tissue health; acts to spare vitamin C, promoting collagen synthesis and functioning in blood vessels; helps maintain healthy skin following exposure to sunlight UV rays*

Powerful Antioxidant

A potent free radical scavenger in both aqueous and lipid phases; significantly reduces free radical induced lipid oxidation; greater free radical scavenging capacity than vitamins C and E*

MASQUELIER'S OPCs

MASQUELIER'S OPCs represents a significant discovery in human health and nutrition.

Product-specific science and clinical research spanning 60 years, plus decades of medicinal use in France.

No other ingredient in the U.S. market matches the chemical profile of the authentic MASQUELIER'S OPCs.

Highly bio-active and rapidly absorbed, ensuring the health benefits customers expect.
